|---|---|---|---|
| **4K-5K** | **499** | **18** | **~400** |
| প্রতিদিন লক্ষ্য কাঁচা lead scrape | প্রতি verification CSV-তে data row | মোট sender inbox | প্রতিদিন operational email target |

STEP 01

### Keyword + Area

নিস বাছাই করে US state, city ও ছোট area ধরে search plan তৈরি করুন।

>

STEP 02

### Lead Data Tools

Google Maps বা Google Search থেকে business data export করুন।

>

STEP 03

### Raw CSV

10টি core field এবং দরকার হলে phone, WhatsApp, hours ইত্যাদি নিন।

STEP 04

### Clean + Split

ChatGPT দিয়ে missing email বাদ, duplicate email বাদ, তারপর 499 row করে ভাগ।

>

STEP 05

### Lumrid Verify

প্রতিটি batch verify করে usable email data download করুন।

>

STEP 06

### Merge + Dedupe

সব verified file একত্র করে আবার duplicate email remove করুন।

STEP 07

### Personalize

{{FIRST_NAME}} এবং {{ICEBREAKER}} যোগ করুন।

>

STEP 08

### Manyreach Send

18 inbox balance করে প্রতি inbox সর্বোচ্চ 25 email রাখুন।

>

STEP 09

### Track + Improve

Replies, positive replies, meetings, clients এবং inbox health track করুন।

### আপনার সাধারণ ডেটা ফানেল

| | |
|---|---|
| Raw scraped data | 4,000-5,000 |
| Email-present + deduped | Variable |
| Verified usable leads | ~1,200-1,800 |
| Final personalized leads | After filters |

**গুরুত্বপূর্ণ বাস্তবতা**

4,000-5,000 raw data থেকে 1,200-1,800 verified lead পাওয়া আপনার কাজের সাধারণ অভিজ্ঞতা। এটি নিশ্চিত সংখ্যা নয়। niche, location, website email availability, duplicate rate এবং verifier result অনুযায়ী সংখ্যা বদলাবে।

**এই workflow-এর প্রথম engine: Lead Data Tools**

ম্যানুয়ালি হাজার হাজার business খোঁজা বাস্তবসম্মত নয়। Google Maps Scraper ও Google Search Scraper bundle ব্যবহার করে area-by-area data collection অটোমেট করুন।

**৳4,500 Lifetime Access**

https://academy.thesyncwave.com/lead-data-tools

02

SYNC WAVE OPERATING SYSTEM

# টুল, ইনফ্রাস্ট্রাকচার, খরচ ও সক্ষমতা

একটি stable cold-email system শুধু copy নয়। আলাদা domain, inbox, verifier, data source, sending platform ও tracking system একসাথে কাজ করে।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

## বর্তমান Business Snapshot

| | | |
|---|---|---|
| **6**<br>মোট sending domain | **3**<br>প্রতি domain-এ inbox | **18**<br>মোট inbox |
| **25**<br>প্রতি inbox daily limit | **450**<br>theoretical daily capacity | **~400**<br>practical daily operating target |

**Capacity logic**

18 inbox x 25 email = 450 email theoretical maximum। বাস্তবে buffer রেখে প্রায় 400/day চালালে inbox balance, reply handling এবং unexpected issue manage করা সহজ হয়।

| Item | Current setup / cost | Operational note |
|---|---|---|
| Total domains | 6 | 5টি Spaceship, 1টি Namecheap |
| Inboxes | 18 total | প্রতি domain-এ 3টি |
| Inbox monthly cost | $45/month | $2.50 x 18; payment/FX fee ধরে প্রায় ৳6,000-7,000 হতে পারে |
| Working exchange rate | 122.80 BDT / USD | Internal planning rate; actual charge date-এ পরিবর্তিত হতে পারে |
| Manyreach credits | 100,000 credits | আপনার ব্যবহারে আনুমানিক 3.5-5 মাস; follow-up ও volume অনুযায়ী বদলাবে |
| Manyreach spend | প্রায় ৳19,000-25,000 | Plan এবং payment conversion অনুযায়ী |
| Lead Data Tools | ৳4,500 lifetime | No monthly fee, unlimited scraping, fixed one-time price |

## Domain Directory

# প্রয়োজনীয় Tool Stack

### Lead collection

**Lead Data Tools**
Google Maps Scraper + Google Search Scraper

https://academy.thesyncwave.com/lead-data-tools

### Data processing

**ChatGPT**
Clean, split, merge, filter এবং personalization prompt চালানোর জন্য।

### Email verification

**Lumrid**
499-row CSV batch verify করার জন্য।

https://app.lumrid.com/

### Campaign sending

**Manyreach**
Campaign import, inbox assignment, sequence ও metrics।

https://manyreach.netlify.app/

### Inbox provider

**Mithmill**
18 sender inbox order এবং management।

https://mithmill.com/

### Storage + operating system

**Google Drive + Notion**
প্রতিটি CSV, report, campaign এবং renewal track করুন।

**Privacy rule:** নিজের একটি private Drive workspace তৈরি করুন। Public guide-এ raw lead folder বা personal Drive link কখনো শেয়ার করবেন না।

### Ownership rule

Primary business domain দিয়ে cold outreach না করে আলাদা sending domains ব্যবহার করুন। সব access, renewal date, owner ও campaign assignment tracker-এ রাখুন।

03

SYNC WAVE OPERATING SYSTEM

# নিস, লোকেশন ও ডেটা সোর্সিং প্ল্যান

ভালো data scraping-এর শুরু tool দিয়ে নয়, search structure দিয়ে। একই keyword পুরো US-এ একবার চালানোর বদলে state -> city -> ছোট area ধরে কাজ করুন।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

## Geographic Expansion Model

| | |
|---|---|
| STEP 1 | **Country**<br>প্রথমে United States-এর মতো একটি দেশ ঠিক করুন। এক campaign-এ একাধিক দেশ mix না করাই পরিষ্কার। |
| STEP 2 | **State**<br>50টি state-এর master list তৈরি করুন এবং কাজের status রাখুন: Pending / Running / Completed। |
| STEP 3 | **City**<br>প্রতিটি state-এর বড়, মাঝারি ও ছোট city আলাদা search queue-তে রাখুন। |
| STEP 4 | **Area / suburb**<br>একই city-র neighbourhood, suburb ও surrounding area ধরে আলাদা search চালান। |
| STEP 5 | **Keyword variation**<br>একই service-এর 3-5টি keyword variation ব্যবহার করুন, তারপর email দিয়ে dedupe করুন। |

**কেন ছোট area ধরে search করবেন?**

Google Maps একই broad query-তে সব business দেখায় না। area ছোট করলে hidden/local listing পাওয়া যায়, coverage বাড়ে এবং file naming পরিষ্কার থাকে।

## Owner: Rasel - Search Keywords

videographer | video production company | video production studio | video production agency | real estate videographer | property videographer | real estate video production | film production company | film studio | film production studio | media production company | media production agency | creative agency | digital media agency | e-learning video production | educational video production

# Owner: Abrar Khan - Search Keywords

Social Media Marketing Agency | Digital Marketing Agency | Content Marketing Agency | Real Estate Marketing Agency | Creative Agency | Advertising Agency | Influencer Marketing Agency | B2B Marketing Agency | Real Estate Brokerage | Luxury Real Estate Agent | E-commerce Marketing | Fitness Studio | Business Coach

# একটি Daily Search Plan-এর উদাহরণ

| Queue | Keyword | Location | Target | Output file |
|---|---|---|---|---|
| Q01 | Real Estate Marketing Agency | Dallas, Texas | 500-1,000 raw | RAW_Real_Estate_Marketing_Dallas_[DATE]_V1.csv |
| Q02 | Luxury Real Estate Agent | Austin, Texas | 500-1,000 raw | RAW_Luxury_Real_Estate_Austin_[DATE]_V1.csv |
| Q03 | Digital Marketing Agency | Houston, Texas | 500-1,000 raw | RAW_Digital_Marketing_Houston_[DATE]_V1.csv |
| Q04 | Business Coach | San Antonio, Texas | 500-1,000 raw | RAW_Business_Coach_San_Antonio_[DATE]_V1.csv |
| Q05 | Fitness Studio | Fort Worth, Texas | 500-1,000 raw | RAW_Fitness_Studio_Fort_Worth_[DATE]_V1.csv |

- **Exclusion before scraping**

Wedding, bridal, elopement এবং music-video niche আপনার prospecting list-এ না রাখাই ভালো। তবুও mixed result এলে personalization stage-এ verified CSV information দেখে remove করা হবে।

## US area list দ্রুত খুলুন

State, city ও area planning-এর জন্য SYNC WAVE-এর area resource ব্যবহার করুন।

**Open USA Areas List**

https://syncwaveemail.netlify.app/

04

SYNC WAVE OPERATING SYSTEM

# Lead Data Tools দিয়ে স্ক্র্যাপিং

এই ধাপে কাঁচা business data তৈরি হবে। Google Maps Scraper প্রধান tool; Google Search Scraper অতিরিক্ত coverage, website email ও search-based result-এর জন্য ব্যবহার করুন।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

| INPUT | ACTION | OUTPUT |
|---|---|---|
| Keyword + city | Lead Data Tools scrape | Raw CSV export |

## Lead Data Tools by Abrar Khan

Google Maps Scraper + Google Search Scraper এক bundle-এ। Lifetime access ৳4,500, কোনো monthly fee নেই, unlimited data scraping।

**Buy / Order Now**

https://academy.thesyncwave.com/lead-data-tools

## Google Maps Scraper Workflow

**STEP 1**

**Search query তৈরি**

Keyword + city/state লিখুন। যেমন: `Real Estate Brokerage in Phoenix Arizona`

**STEP 2**

**Result load করুন**

Maps result scroll/load হতে দিন। tool-কে সময় দিন যাতে বেশি listing collect হয়।

**STEP 3**

**Scrape start করুন**

Required field select করে scrape চালু করুন। tab/queue status খেয়াল করুন।

**STEP 4**

**Export করুন**

CSV export করে niche, location, date ও version দিয়ে নাম দিন।

**STEP 5**

**Next area**

একটি area শেষ হলে পরের city/suburb queue চালান। একই keyword-এর coverage সম্পূর্ণ করুন।

# Exact 10 Core Export Fields

| # | Field | কাজ |
|---|---|---|
| 1 | Name | Company বা contact name |
| 2 | City | Local context ও geo filtering |
| 3 | Email_From_WEBSITE | Cold outreach-এর প্রধান email |
| 4 | Website | Source যাচাই ও context |
| 5 | First_category | Primary business type |
| 6 | Second_category | Secondary specialty |
| 7 | Reviews_count | Verified review proof point |
| 8 | Average_rating | Review context |
| 9 | Instagram_URL | Extra reference point |
| 10 | Meta_Description | Service, positioning ও icebreaker-এর সবচেয়ে useful text |

# Optional Expanded Fields

**Phone number** **WhatsApp** **Full address** **State** **Country** **Business hours** **Facebook URL** **Google Maps URL** **Website text**

Core 10 field অবশ্যই অগ্রাধিকার দিন। optional field বেশি নিলে personalization ভালো হতে পারে, তবে file size এবং processing time বাড়বে।

# Google Search Scraper কখন ব্যবহার করবেন

- **Maps-এ result কম হলে**

Business directory, niche page, service page ও website result থেকে extra lead সংগ্রহ করুন।

- **Website-first data দরকার হলে**

Google search result থেকে website context, title, meta description ও email source enrich করুন।

- **Keyword research**

Same niche-এর alternative terms এবং local category খুঁজে পরের Maps search plan তৈরি করুন।

- **Coverage gap fill**

Maps export-এর email-missing business website search করে additional contact data বের করুন।

- **Scraping quality rule**

একই business বিভিন্ন keyword ও area-তে একাধিকবার আসতে পারে। raw stage-এ সব রাখুন; cleaning stage-এ email-based dedupe করা হবে।

- **Maps Tutorial**
  Watch tutorial
- **Search Tutorial**
  Watch tutorial
- **Browser Install**
  Watch tutorial

05

SYNC WAVE OPERATING SYSTEM

# এক্সপোর্ট, ফাইল নাম ও ড্রাইভ ব্যবস্থাপনা

ফাইলের নাম ভুল হলে 5,000 lead-এর project সহজেই গুলিয়ে যায়। প্রতিটি stage-এর নির্দিষ্ট naming format এবং Drive folder discipline বাধ্যতামূলক রাখুন।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

## Drive Rule

- **প্রতিটি file নিজের private Drive-এ রাখুন**

CSV, ZIP, verification export, final personalized file এবং report নিজের Google Drive workspace-এ রাখুন। file name-এ date, month, year বা ISO date **YYYY-MM-DD** রাখুন।

Private data | Public link নয়

## Folder Structure

| Folder | কী থাকবে | Example |
|---|---|---|
| 01_RAW_SCRAPES | Google Maps / Search raw CSV | RAW_Digital_Marketing_Chicago_2026-07-11_V1.csv |
| 02_CLEAN_SPLITS | 499-row split CSV ও ZIP | Emails_csv_splits_for_lumrid_499_Data_V1_by_Abrar_Khan.csv |
| 03_VERIFIED | Lumrid verified export | VERIFIED_Digital_Marketing_Chicago_2026-07-11_V1.csv |
| 04_MERGED | সব verified file-এর deduped merge | MERGED_VERIFIED_Digital_Marketing_Chicago_2026-07-11.csv |
| 05_PERSONALIZED | Manyreach-ready final CSV | Personalized_Cold_Email_1458_By_Abrar_Khan.csv |
| 06_REPORTS | Cleaning, verification ও campaign report | Campaign_Report_Chicago_2026-07-11.pdf |

# Official File Naming System

| Stage | Exact naming format |
|---|---|
| Raw scrape | RAW_[NICHE]_[CITY]_[YYYY-MM-DD]_V[number].csv |
| Clean split | Emails_csv_splits_for_lumrid_499_Data_V[number]_by_Abrar_Khan.csv |
| Split ZIP | Emails_csv_splits_for_lumrid_499_Data_by_Abrar_Khan.zip |
| Verified export | VERIFIED_[NICHE]_[CITY]_[YYYY-MM-DD]_V[number].csv |
| Merged list | MERGED_VERIFIED_[NICHE]_[CITY]_[YYYY-MM-DD].csv |
| Personalized final | Personalized_Cold_Email_[FINAL_LEAD_COUNT]_By_Abrar_Khan.csv |

**Version rule**

কোনো file overwrite করবেন না। re-run হলে V1 -> V2 -> V3 বাড়ান। final, final-new, latest-final ধরনের অস্পষ্ট নাম ব্যবহার করবেন না।

# Data Handoff Checklist

- [x] File opens correctly এবং UTF-8 text ভাঙেনি
- [x] Header row আছে
- [x] Email column identify করা যায়
- [x] Raw file unchanged copy Drive-এ আছে
- [x] Niche, city, date, version file name-এ আছে
- [x] Lead Batch Tracker-এ raw count update করা হয়েছে

ORIGINAL PLAYBOOK | MADE BY ABRAR KHAN

06

SYNC WAVE OPERATING SYSTEM

# ChatGPT দিয়ে ক্লিন, ডিডুপ ও 499 করে স্প্লিট

একবারে 4,000-7,000 row verifier-এ না দিয়ে clean করার পর 499 data row করে ভাগ করুন। প্রতিটি split file-এ original header থাকবে।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

| INPUT | ACTION | OUTPUT |
| --- | --- | --- |
| Raw lead file | Clean, dedupe, split | 499-row CSV files |

## কেন 499, 500 নয়?

### 499 data rows

Header বাদ দিয়ে প্রতিটি file-এ 499 lead থাকবে। এতে verifier limit বা row-count confusion এড়ানো যায়।

### Final file

শুধু শেষ split file-এ 499-এর কম data row থাকতে পারবে। কোনো file 499-এর বেশি হবে না।

## Cleaning Logic

| | |
| --- | --- |
| STEP 1 | **Valid email check**<br>Email নেই এমন full row remove করুন। |
| STEP 2 | **Email dedupe**<br>একই email একাধিকবার থাকলে প্রথম row রাখুন, পরেরগুলো remove করুন। |
| STEP 3 | **Original structure lock**<br>Column name, order, formatting এবং row content edit করবেন না। |
| STEP 4 | **499-row split**<br>Original order বজায় রেখে batch তৈরি করুন। |
| STEP 5 | **Report + ZIP**<br>Original rows, missing, duplicate, clean rows এবং split count report নিন। |

**ChatGPT upload rule**

Large file হলে আগে raw CSV upload করুন এবং Prompt 1 চালান। output download করার পর random 2-3টি split file খুলে row count ও header check করুন।

## Minimum QA Before Lumrid

- ✓ প্রতিটি file-এ একই header আছে
- ✓ প্রতি file-এ 499 data row, শুধু final file কম হতে পারে
- ✓ Duplicate email নেই
- ✓ Empty email row নেই
- ✓ ZIP-এর ভেতরের সব file আলাদা version number পেয়েছে
- ✓ Clean report Drive ও Notion-এ save হয়েছে

**Prompt 1 পুরোটা Chapter 15-এ আছে**

Copy-paste prompt original columns অপরিবর্তিত রেখে clean, dedupe, split, ZIP এবং final report চায়।

Jump to Prompt 1

ORIGINAL PLAYBOOK | MADE BY ABRAR KHAN

07

SYNC WAVE OPERATING SYSTEM

# Lumrid ইমেইল ভেরিফিকেশন

ভেরিফিকেশন ছাড়া cold email পাঠালে bounce risk বাড়ে, sender reputation ক্ষতিগ্রস্ত হতে পারে এবং inbox capacity নষ্ট হয়।

ORIGINAL SYSTEM BY ABRAR KHAN
FOUNDER, SYNC WAVE | academy.thesyncwave.com

## Verification Workflow

| | |
|---|---|
| STEP 1 | **Lumrid login**<br>https://app.lumrid.com/ খুলুন এবং নতুন verification job তৈরি করুন। |
| STEP 2 | **Upload one split**<br>499-row CSV upload করুন। email column ঠিকভাবে map হয়েছে কি না দেখুন। |
| STEP 3 | **Run verification**<br>Job complete না হওয়া পর্যন্ত status track করুন। একই batch ভুল করে দুইবার run করবেন না। |
| STEP 4 | **Download result**<br>Verified result download করুন। original headers ও useful columns retain করুন। |
| STEP 5 | **Rename + upload**<br>`VERIFIED_[NICHE]_[CITY]_[DATE]_V[number].csv` নামে Drive-এ রাখুন। |

### Standard campaign

প্রতি batch অন্তত একবার verify করুন এবং final export-এর email status inspect করুন।

### Important campaign

Uploaded roadmap-এর recommended internal standard: গুরুত্বপূর্ণ campaign-এ 3 verification checks ব্যবহার করা যেতে পারে। একই team rule সবসময় consistent রাখুন।

## Verification Result Handling

| Status type | Action | Note |
|---|---|---|
| Valid / Deliverable | Keep | Final merge-এর জন্য approved |
| Invalid / Undeliverable | Remove | Sending list-এ নেবেন না |
| Unknown / Risky | Separate | Important campaign হলে re-check; blind send করবেন না |
| Disposable / Spam-trap warning | Remove / isolate | Risky category আলাদা report-এ রাখুন |
| Role address | Campaign policy অনুযায়ী | info@, hello@ ইত্যাদি niche ও offer অনুযায়ী evaluate করুন |

**Do not mix raw and verified files**

Raw, clean split এবং verified export আলাদা folder-এ রাখুন। ভুল file Manyreach-এ import হলে পুরো verification process অর্থহীন হয়ে যাবে।

## Expected Yield Tracking

প্রতিটি batch-এর জন্য এই 5টি সংখ্যা লিখুন:

Uploaded | Valid | Invalid | Unknown | Final kept

এতে কোন niche, city বা scraper source থেকে বেশি verified email পাওয়া যাচ্ছে তা 2-4 সপ্তাহের মধ্যে পরিষ্কার হবে।

08

SYNC WAVE OPERATING SYSTEM

# ভেরিফাইড CSV মার্জ ও ডিডুপ

সব Lumrid export একসাথে merge করে email address দিয়ে আবার dedupe করুন। প্রথম occurrence রাখুন, পরের duplicate row remove করুন।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

INPUT
Verified batches

ACTION
Merge + email dedupe

OUTPUT
One final list

## Merge Rules

- সব uploaded CSV এক final CSV-তে merge করুন
- Original column names, order, data এবং formatting অপরিবর্তিত রাখুন
- Email column থাকলে email address দিয়ে duplicate remove করুন
- প্রথম duplicate row রাখুন; পরের row remove করুন
- Email column না থাকলে শুধু fully identical duplicate remove করুন
- `info@visuallab.com.au` পাওয়া গেলে full row remove করুন

## Merge Report

| | |
|---|---|
| **A** | Total CSV files merged |
| **B** | Total rows before merge |
| **C** | Duplicate rows removed |
| **D** | Specific excluded row removed |
| **E** | Final rows remaining |
| **1** | Final merged CSV |

- **Final merged file**

`MERGED_VERIFIED_[NICHE]_[CITY]_[YYYY-MM-DD].csv` নামে save করুন এবং Lead Batch Tracker status

- **Ready for Personalization**

করুন।

### Prompt 2 ব্যবহার করুন

এই exact prompt সব verified CSV merge, duplicate remove, নির্দিষ্ট email delete এবং complete report তৈরি করে।

Jump to Prompt 2

09

SYNC WAVE OPERATING SYSTEM

# ফিল্টারিং ও পার্সোনালাইজেশন

Final CSV-তে শুধু দুইটি নতুন column যোগ হবে: {{FIRST_NAME}} এবং {{ICEBREAKER}}।
কোনো original column edit, delete বা reorder করা যাবে না।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

INPUT
Final clean CSV

ACTION
Filter + personalize

OUTPUT
Outreach-ready CSV

## Final CSV Structure

**Original columns** -> unchanged, same order

{FIRST_NAME} {ICEBREAKER} -> only two new columns at the end

## Location Exclusion

CSV-তে স্পষ্টভাবে নিচের location থাকলে row remove করুন:

Bangladesh Dhaka Pakistan

Name, email domain, language, ethnicity বা অনুমান দেখে location remove করবেন না। শুধু verified CSV text ব্যবহার করুন।

## Industry Exclusion

Wedding Wedding Photographer Wedding Videographer Bridal Bride Groom Elopement Marriage Nikah Music Video Music Video Production

Row-এর যেকোনো original column-এ business-এর কাজ wedding, bridal, elopement বা music video স্পষ্ট হলে remove করুন। guess করবেন না।

# {FIRST_NAME} Priority

| Priority | Source column |
|---|---|
| 1 | Company |
| 2 | Business Name |
| 3 | Company Name |
| 4 | Organization |
| 5 | Brand |
| 6 | Studio |
| 7 | Agency |
| 8 | Website Business Name |
| 9 | Name column |

### Name cleaning rule

প্রথম `-`, `|`, `/` বা `,`-এর আগের অংশ নিন। separator এবং পরের সব text remove করুন। capitalization পরিবর্তন করবেন না।

# {ICEBREAKER} Quality Rules

### Must do

- ✓ Always start with "I"
- ✓ Exactly one sentence, one line
- ✓ Simple everyday English
- ✓ Only verified CSV information
- ✓ One main verified detail
- ✓ Subtle, honest compliment when possible

### Never do

- x No question
- x No sales pitch or CTA
- x No invented facts
- x No web browsing
- x No "I wanted to reach out"
- x No "amazing / impressive" unless verified wording

# Personalization Priority

| | |
|---|---|
| STEP 1 | **Specific service**<br>Meta description বা category থেকে clear service। |
| STEP 2 | **City / service area**<br>Local context ব্যবহার করুন। |
| STEP 3 | **Business category**<br>Agency, studio, brokerage, coach ইত্যাদি। |
| STEP 4 | **Website detail**<br>Portfolio, testimonial, projects বা service focus। |
| STEP 5 | **Review / customer / industry**<br>শুধু CSV-তে থাকা verified detail। |
| STEP 6 | **Honest fallback**<br>Useful detail না থাকলে শুধু business name দিয়ে simple sentence। |

### Fallback examples

I was going through business listings and saw {FIRST_NAME} there.

I was browsing local listings and {FIRST_NAME} caught my eye.

I spent a little time looking through businesses and found {FIRST_NAME}.

**Prompt 3 হলো সবচেয়ে গুরুত্বপূর্ণ QA gate**

এটি location ও industry exclusion, name cleaning, verified-only icebreaker এবং final UTF-8 file naming enforce করে।

SYNC WAVE OPERATING SYSTEM

# Manyreach ক্যাম্পেইন সেটআপ ও সেন্ডিং

Final personalized CSV upload করার পর inbox assignment, field mapping, sequence, daily limits এবং campaign reporting ঠিকভাবে configure করুন।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

| INPUT | ACTION | OUTPUT |
|---|---|---|
| Final CSV | Map, test, schedule | Live campaign |

## Import Checklist

- [x] File name `Personalized_Cold_Email_[COUNT]_By_Abrar_Khan.csv`
- [x] Email column correctly mapped
- [x] `{FIRST_NAME}` mapped
- [x] `{ICEBREAKER}` mapped
- [x] Excluded locations / niches random sample দিয়ে re-check
- [x] Duplicate lead import prevention enabled বা prior campaign suppression checked
- [x] Campaign name-এ niche + location + month/year

## Sending Architecture

| 6 | 18 | 25 |
|---|---|---|
| Domains | Inboxes | Max emails/inbox/day |

**Balanced assignment**

একটি campaign শুধু কয়েকটি inbox-এ overload করবেন না। 18 inbox জুড়ে সমানভাবে lead distribute করুন। কোনো inbox issue দেখালে campaign থেকে pause করে tracker status

**Issue**

দিন।

## Sequence Structure

| Touch | Purpose | Recommended logic |
|---|---|---|
| Initial email | Context + offer + simple CTA | Icebreaker ব্যবহার করুন, short রাখুন |
| Follow-up 1 | Gentle bump | একটি line, same thread |
| Follow-up 2 | Specific value | Relevant workflow বা outcome mention করুন |
| Follow-up 3 | Low-friction option | Examples পাঠাবেন কি না জিজ্ঞেস করুন |
| Follow-up 4 | Close the loop | Respectful breakup; pressure নয় |

**Cadence**

আপনার system-এ 1 initial + 4 follow-ups আছে। Exact delay campaign ও reply behaviour অনুযায়ী সেট করুন; একই দিনে multiple follow-up পাঠাবেন না।

## Launch QA

**Before launch**

- ✓ নিজের test email-এ variable render check
- ✓ Broken link নেই
- ✓ Signature consistent
- ✓ Plain-text readable
- ✓ Daily cap correct
- ✓ Timezone correct

**Stop campaign when**

- x Bounce suddenly rises
- x Inbox authentication / provider issue
- x Wrong personalization দেখা যায়
- x Wrong niche/location import
- x Multiple spam complaints
- x Sender domain reputation concern

SYNC WAVE OPERATING SYSTEM

# কোল্ড ইমেইল কপি ও Follow-up কাঠামো

Personalization ভালো হলেও email বড়, অস্পষ্ট বা অতিরিক্ত salesy হলে reply কমে। প্রতিটি email একটি পরিষ্কার উদ্দেশ্য নিয়ে লিখুন।

ORIGINAL SYSTEM BY ABRAR KHAN
FOUNDER, SYNC WAVE | academy.thesyncwave.com

| INPUT | ACTION | OUTPUT |
|---|---|---|
| Verified icebreaker | Email + 4 follow-ups | Reply opportunity |

## Initial Email Formula

**LINE 1**
**Verified icebreaker**
{ICEBREAKER}

>

**LINE 2**
**Relevant problem**
তাদের niche-এর common production bottleneck।

>

**LINE 3**
**Simple offer + CTA**
একটি outcome ও yes/no style question।

Sample Initial Email — CUSTOMIZE BEFORE USE

```
Subject: quick question, {{FIRST_NAME}}

Hi {{FIRST_NAME}},

{{ICEBREAKER}}

We handle short-form video editing for agencies and businesses that need consistent monthly content without adding another in-house editor.

Would it be useful if I sent 2 relevant examples?

Abrar Khan
Founder, SYNC WAVE
https://thesyncwave.com/
```

**Proof rule**

Client count, revenue, turnaround, niche expertise বা result শুধু সত্য ও প্রমাণযোগ্য হলে লিখুন। sample text নিজের campaign offer অনুযায়ী বদলান।

# Four Follow-up Examples

**Follow-up 1 | Gentle bump** — SAME THREAD

Hi {{FIRST_NAME}}, just bringing this back to the top of your inbox - worth sending a couple of examples?

**Follow-up 2 | Specific value** — SAME THREAD

We can take a monthly batch of raw footage and keep the editing style, captions and delivery consistent across every video. Is that something your team currently outsources?

**Follow-up 3 | Low friction** — SAME THREAD

I can send a few edits closest to the type of content your business publishes, so you can quickly see whether the style fits.

**Follow-up 4 | Close loop** — SAME THREAD

I'll close the loop after this. If video editing becomes a priority later, feel free to keep SYNC WAVE in mind.

# Copy Quality Checklist

## Keep

- ✓ Short paragraphs
- ✓ Simple language
- ✓ One offer
- ✓ One CTA
- ✓ Verified personalization
- ✓ Consistent signature

## Remove

- x Long agency introduction
- x Multiple links in first email
- x Fake compliment
- x Unverified result claims
- x Urgency pressure
- x Heavy formatting

## CTA examples

**Worth a chat?** **Want me to send a few examples?** **Would 2 relevant samples be useful?**

ORIGINAL PLAYBOOK

# C. Domain & Inbox Tracker

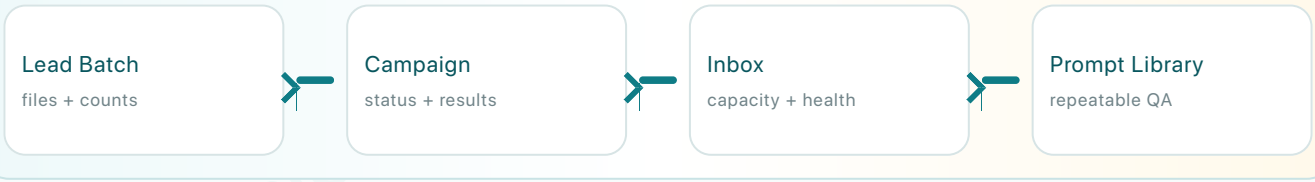

| Property | Type | Example |
|---|---|---|
| Email Address | Title | abrar@syncwaveworks.com |
| Domain | Select | syncwaveworks.com |
| Provider | Select | Mithmill |
| Daily Limit | Number | 25 |
| Current Status | Select | Warmup / Active / Paused / Issue |
| Warmup Started | Date | Date |
| Campaign Assigned | Relation | Campaign Tracker |
| Renew Date | Date | June 10, 2027 |
| Notes | Text | Deliverability or access notes |

# D. Prompt Library

| Prompt Name | Use when |
|---|---|
| CSV Clean + Split | Raw scraper CSV ready |
| Lumrid Verification | Split batch ready |
| Merge + Dedupe | All verified batches ready |
| Personalization | Final merged clean CSV ready |

**Single source of truth**

Drive file link এবং Notion row একে অপরের সাথে link করুন। Slack/WhatsApp message-এর উপর project status নির্ভর করবেন না।

13

SYNC WAVE OPERATING SYSTEM

# দৈনিক, সাপ্তাহিক ও মাসিক SOP

একটি repeatable routine থাকলে data backlog, duplicate verification, inbox overload এবং campaign tracking gap কমে যায়।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

| INPUT | ACTION | OUTPUT |
|---|---|---|
| Daily queue | Review + update | Consistent output |

## Daily SOP

**STEP 1 — Campaign health check**
Pause, bounce, wrong variable, inbox issue ও replies দেখুন।

**STEP 2 — Reply handling**
Positive, neutral, not interested, out-of-office ও unsubscribe reply classify করুন।

**STEP 3 — Scrape queue**
Keyword + area plan অনুযায়ী 4,000-5,000 raw data target করুন।

**STEP 4 — Clean / verify queue**
আগের দিনের raw file clean, split ও Lumrid upload করুন।

**STEP 5 — Tracker update**
Raw, clean, verified, final, sent এবং reply count update করুন।

**STEP 6 — File backup**
প্রতিটি final output date সহ Drive-এ upload করুন।

# Weekly SOP

### Data review

- ✓ কোন keyword বেশি verified lead দিচ্ছে
- ✓ কোন city-তে duplicate বেশি
- ✓ কোন source-এ email availability ভালো
- ✓ Excluded niche/location কত

### Campaign review

- ✓ Reply ও positive reply by niche
- ✓ CTA performance
- ✓ Follow-up contribution
- ✓ Meetings এবং clients closed

### Inbox review

- ✓ Per-inbox send count
- ✓ Bounce / error trend
- ✓ Paused or issue inbox
- ✓ Renewal/payment status

### Next-week plan

- ✓ Top 3 niches
- ✓ Top locations
- ✓ Scrape ownership
- ✓ Verification backlog

# Monthly SOP

| Review area | Questions | Action |
|---|---|---|
| Cost | Inbox, credits, domains থেকে কত spend? | Monthly cost sheet update |
| Data | Raw -> verified conversion কেমন? | Low-yield niche বাদ / refine |
| Campaign | কোন offer সবচেয়ে বেশি positive reply? | Winning angle scale |
| Sales | Meetings থেকে কত client? | Qualification ও follow-up improve |
| Infrastructure | কোন domain/inbox renewal বা issue? | Repair, replace বা renew |

### Pipeline rule

আজ scrape করা data আজই send করা বাধ্যতামূলক নয়। clean -> verify -> merge -> personalize -> QA শেষ না হলে campaign upload করবেন না।

14

SYNC WAVE OPERATING SYSTEM

# মেট্রিক্স, সমস্যা শনাক্তকরণ ও সমাধান

Open rate একা সিদ্ধান্ত নেওয়ার metric নয়। মূল business outcome হলো positive reply, qualified meeting এবং client close।

ORIGINAL SYSTEM BY ABRAR KHAN
FOUNDER, SYNC WAVE | academy.thesyncwave.com

INPUT
Campaign data

ACTION
Calculate key rates

OUTPUT
Better decisions

## Core Metrics & Formulas

| Metric | Formula | কেন দরকার |
|---|---|---|
| Delivery rate | Delivered / Sent x 100 | Data ও inbox health |
| Reply rate | Total replies / Delivered x 100 | Copy + targeting response |
| Positive reply rate | Positive replies / Delivered x 100 | Offer-market fit |
| Meeting rate | Meetings booked / Delivered x 100 | CTA ও qualification |
| Close rate | Clients closed / Meetings x 100 | Sales process effectiveness |
| Verified yield | Verified valid / Raw leads x 100 | Source এবং niche quality |

# Troubleshooting Matrix

| Problem | Likely area | What to check first |
|---|---|---|
| High bounce | Data / verifier / old list | Wrong file import? unknown emails included? verification date? |
| Delivered but no replies | Targeting / copy / offer | Niche fit, verified icebreaker, CTA, email length |
| Replies but no interest | Offer mismatch | Specific outcome, pricing position, wrong buyer type |
| Positive replies ghost | Follow-up / next step friction | Fast response, simple scheduling, relevant portfolio |
| Wrong personalization | CSV mapping / prompt QA | Original columns, name separator, fallback rule |
| Duplicate outreach | Dedupe / suppression | Email-based dedupe and previous campaign list |
| One inbox struggling | Inbox/domain health | Pause that inbox, provider status, authentication |
| Verification yield low | Source / niche / area | Website email field, search scraper enrichment, keyword quality |

# Decision Order

STEP 1

**Protect infrastructure**

Bounce বা inbox issue হলে আগে sending pause করুন।

STEP 2

**Check data**

Verified file, exclusions, duplicates ও email mapping audit করুন।

STEP 3

**Check targeting**

সঠিক buyer, niche এবং location কি না দেখুন।

STEP 4

**Check copy**

Icebreaker, value proposition, CTA এবং length compare করুন।

STEP 5

**Scale only winners**

Positive replies ও meetings পাওয়া segment-এ volume বাড়ান।

- **No blind scaling**

Reply কম দেখে সঙ্গে সঙ্গে আরও domain/inbox কিনবেন না। আগে existing 18 inbox-এর data quality, message, offer এবং response handling ঠিক করুন।

15

ORIGINAL COPY-PASTE LIBRARY

# পূর্ণ Prompt Library

নিচের promptগুলো uploaded roadmap থেকে সম্পূর্ণ রাখা হয়েছে। Prompt-এর instruction পরিবর্তন না করে সংশ্লিষ্ট stage-এ ব্যবহার করুন।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

**Usage**

প্রথমে সংশ্লিষ্ট CSV upload করুন, তারপর পুরো prompt একবারে paste করুন। Output পাওয়ার পর report এবং 5-row sample manually inspect করুন।

ORIGINAL PLAYBOOK | MADE BY ABRAR KHAN

# Prompt 1 - CSV Clean, Deduplicate, and Split

Prompt 1 COPY | PASTE | RUN

CSV Clean, Deduplicate, and Split Task

I have uploaded a CSV file. Please clean it first, then split the cleaned file into smaller CSV files.

STEP 1 - CLEAN THE CSV

1. Check every data row for a valid email address.
2. Remove the entire row if it does not contain an email address.
3. Find duplicate email addresses and keep only the first occurrence.
4. Remove every later row containing the same email address.
5. Do not edit, rename, reorder, format, or modify any remaining data.
6. Keep all original columns and the original header exactly as they are.
7. Only remove rows that have no email address or contain a duplicate email.

STEP 2 - CLEANING REPORT

Before splitting, provide:
- Total original data rows
- Rows containing valid emails
- Rows removed because email was missing
- Duplicate-email rows removed
- Final clean data rows remaining
- Final unique email count

STEP 3 - SPLIT THE CLEAN CSV

1. Keep the original header row in every split CSV file.
2. Each split file must contain exactly 499 data rows.
3. Only the final file may contain fewer than 499 data rows.
4. Do not create any file with more than 499 data rows.
5. Do not make any changes to columns, formatting, row order, or content.
6. Keep the cleaned rows in their original order.

REQUIRED FILE NAMING FORMAT

Emails_csv_splits for lumrid 499 Data V[number] row by Abrar khan.csv

Examples:
- Emails_csv_splits for lumrid 499 Data V1 row by Abrar khan.csv
- Emails_csv_splits for lumrid 499 Data V2 row by Abrar khan.csv
- Emails_csv_splits for lumrid 499 Data V3 row by Abrar khan.csv

Create one ZIP file named:
Emails_csv_splits for lumrid 499 Data by Abrar khan.zip

FINAL DELIVERY

Provide:
1. Direct download links for every split CSV file.
2. One direct download link for the ZIP file.
3. A final report showing:
   - Original total rows
   - Missing-email rows removed
   - Duplicate-email rows removed
   - Final clean rows
   - Total split files created
   - Number of data rows in each split file

Important: Do not remove or modify anything except rows with missing emails and duplicate emails. Keep the first valid row for every unique email address.

Created by Abrar Khan

# Prompt 2 - Merge Verified CSVs and Remove Duplicates

Prompt 2 COPY | PASTE | RUN

I uploaded multiple CSV files.

Please complete the following steps exactly:

1. Merge all uploaded CSV files into one final CSV file.
2. Keep all original columns, column names, data, order, and formatting exactly the same.
3. Do not rename, edit, rearrange, or remove any columns.
4. Remove duplicate data:
   - If there is an email column, remove duplicate rows based on the email address.
   - Keep the first row for each email and remove later duplicate email rows.
   - If there is no clear email column, remove only fully identical duplicate rows.
5. Find this email address in the merged data:
   info@visuallab.com.au
6. Remove the full row wherever this email appears.
7. Do not change any other rows or data.
8. Save the final cleaned merged file as one CSV.

After processing, provide:
- Total CSV files merged
- Total rows before merging
- Duplicate rows removed
- Was info@visuallab.com.au found? Yes or No
- Rows removed for info@visuallab.com.au
- Final total rows remaining
- Direct download link for the final cleaned CSV file

Important:
Keep the first version of every duplicate. Do not add formatting or make any unnecessary changes.

ORIGINAL PLAYBOOK | MADE BY ABR

# Prompt 3A - Filtering, CSV Structure & Name Priority

Prompt 3A — COPY / PASTE WITH 3B + 3C

You are an expert cold-email lead-data processor and casual one-line icebreaker writer.

Process the uploaded CSV and return one clean, outreach-ready CSV.

IMPORTANT
Use only verified data inside the uploaded CSV.
Do not browse the web.
Do not research businesses outside the CSV.
Do not invent services, locations, industries, websites, reviews, customers, or social-media details.

FINAL FILE NAME
After all filtering is complete, export the completed UTF-8 CSV using this exact format:

Personalized_Cold_Email_{FINAL_LEAD_COUNT}_By_Abrar_Khan.csv

Replace {FINAL_LEAD_COUNT} with the final number of remaining leads.

FINAL CSV STRUCTURE
1. Keep every original CSV column exactly as it is.
2. Do not rename, delete, overwrite, reorder, or edit any original column.
3. Add these two columns only at the very end:

{{FIRST_NAME}}
{{ICEBREAKER}}

LOCATION EXCLUSION RULE
Remove a lead only when the CSV clearly shows an association with:
- Bangladesh
- Dhaka
- Pakistan

Check all original columns, including:
Company, Business Name, Name, Address, City, State, Country, Service Area, Location, Website Text, Description, Category, Bio, and Google Maps Listing.

Only remove leads where Bangladesh, Dhaka, or Pakistan is clearly written in the CSV.
Do not guess location from a person's name, email address, domain, language, ethnicity, or business name.

INDUSTRY EXCLUSION RULE
Remove any lead clearly connected to wedding-related or music-video-related work.

Check every original CSV column for these terms or closely matching phrases:
Wedding, Weddings, Wedding Photographer, Wedding Photography, Wedding Videographer, Wedding Videography, Bridal, Bride, Groom, Elopement, Marriage, Nikah, Music Video, Music Videos, Music Videographer, Music Video Production, Music Video Director, Music Artist Video, Music Production.

Remove the row only when the CSV clearly shows that the business works in weddings, bridal work, elopements, or music videos.
Do not remove a row based on guesses.

{{FIRST_NAME}} RULE
{{FIRST_NAME}} must never stay blank when there is a usable business or person name anywhere in original columns A through K.

Use this priority order:
1. Company
2. Business Name
3. Company Name
4. Organization
5. Brand
6. Studio
7. Agency
8. Website Business Name
9. Name column

Name cleaning এবং verified-only icebreaker rules পরের পৃষ্ঠার Prompt 3B-তে আছে।

# Prompt 3B - Name Cleaning & Verified Icebreaker Rules

Prompt 3A-এর continuation: এখানে name cleaning এবং icebreaker construction rules আছে।

**Prompt 3B** — CONTINUATION / COPY WITH 3A + 3C

```
IMPORTANT NAME CLEANING RULE
For {{FIRST_NAME}}, always take only the text before the first:
- hyphen: -
- vertical bar: |
- slash: /
- comma: ,

Remove the separator and everything after it.

Examples:
- Dan Hunt - Freelance Cameraman & Jib Operator Birmingham -> Dan Hunt
- Afaqs UK LTD | Asian Wedding Photography And Videography Birmingham -> Afaqs UK LTD
- Bright Frame Studio / Commercial Video Production London -> Bright Frame Studio
- Urban Films, Video Production Manchester -> Urban Films
- David Lee - Photographer | London -> David Lee

Use only the first section before -, |, /, or ,.
Remove extra spaces.
Keep original capitalization.
Do not rewrite or invent a name.
Keep {{FIRST_NAME}} as short as possible.
Leave it blank only when no usable name exists anywhere in columns A through K.

{{ICEBREAKER}} RULE
Write one short, casual, human-sounding icebreaker for every remaining lead.

Every icebreaker must:
- Always start with "I"
- Be exactly one sentence
- Stay on one line
- Use simple everyday English
- Include only verified CSV information
- Include a subtle compliment connected to a real verified detail when possible
- Avoid questions, sales language, offers, pitches, or calls to action
- Sound natural and slightly casual, not corporate
- Use {{FIRST_NAME}} naturally where it fits
- Avoid repeating the exact same opening pattern on consecutive rows
- Use only one main verified detail per sentence
```

ORIGINAL PLAYBOOK

# Prompt 3C - Personalization Priority, QA & Final Delivery

Prompt 3A ও 3B-এর continuation: এখানে personalization priority, examples, final QA এবং response format আছে।

**Prompt 3C** — CONTINUATION / COPY WITH 3A + 3B

```
PERSONALIZATION PRIORITY
Use the strongest verified detail available in this order:
1. Specific service
2. City or service area
3. Business category
4. Website detail such as portfolio, testimonials, services, or projects
5. Google listing detail
6. Review detail
7. Customer type
8. Industry focus
9. {{FIRST_NAME}} only, if no other usable detail exists

ICEBREAKER EXAMPLES
- I was checking out local production businesses and Dan Hunt caught my eye, the cameraman work is clearly presented.
- I was browsing businesses in Birmingham and noticed Afaqs UK LTD, the photography focus comes through clearly.
- I was looking through video businesses in the area and Bright Frame Studio stood out, the service offering looks well presented.
- I spent a little time checking local companies and Urban Films caught my eye, the video production focus is clear.
- I was going through company listings and noticed {{FIRST_NAME}} there.

HONEST FALLBACK RULE
When there is no city, service, category, website detail, review, or other useful verified information, use a simple sentence based only on {{FIRST_NAME}}.

Use variations such as:
- I was going through business listings and saw {{FIRST_NAME}} there.
- I was browsing local listings and {{FIRST_NAME}} caught my eye.
- I spent a little time looking through businesses and found {{FIRST_NAME}}.
- I was checking out company listings and noticed {{FIRST_NAME}}.

DO NOT USE
Do not use these words unless they already appear as verified information in the CSV:
amazing, impressive, unique, powerful, stunning, elevating, leveraging, mixing, blending, combining, crafting, growth, scale, help, reach out, content, followers, viral, marketing strategy.

Do not write:
- I wanted to reach out.
- I saw your amazing business.
- Your work is impressive.
- I would love to help.
- I came across your Instagram.
- I saw your content.

FINAL QUALITY CHECKS
1. Keep all original columns unchanged and in the same order.
2. Add {{FIRST_NAME}} and {{ICEBREAKER}} only at the end.
3. Check every row from columns A through K before leaving {{FIRST_NAME}} blank.
4. For {{FIRST_NAME}}, keep only text before the first -, |, /, or ,.
5. Remove rows clearly linked to Bangladesh, Dhaka, or Pakistan.
6. Remove rows clearly linked to weddings, bridal work, elopements, or music videos.
7. Ensure every icebreaker starts with "I".
8. Ensure every icebreaker is one sentence and one line.
9. Ensure every icebreaker uses verified CSV data only.
10. Avoid repetitive sentence openings.
11. Remove extra spaces, broken formatting, and empty-looking values.
12. Do not include questions, CTAs, offers, pitches, or sales language.
13. Export as UTF-8 CSV using this format:
Personalized_Cold_Email_{FINAL_LEAD_COUNT}_By_Abrar_Khan.csv

FINAL RESPONSE FORMAT
After creating the CSV, provide:
- A working download link
- Final exported file name
- Total uploaded leads
- Total removed for excluded locations
- Total removed for wedding or music-video-related work
- Total final leads
- Preview of the first 5 rows showing:
  - Company or business name
  - {{FIRST_NAME}}
  - {{ICEBREAKER}}
```

# Final Checklist, Ownership & Tool Offer

Campaign launch করার আগে এই final gate complete করুন। এই document SYNC WAVE-এর internal operating framework ও Abrar Khan-এর authored roadmap।

ORIGINAL SYSTEM BY ABRAR KHAN

FOUNDER, SYNC WAVE | academy.thesyncwave.com

## End-to-End Final Checklist

### Lead sourcing

- ✓ Keyword + area documented
- ✓ Source field recorded
- ✓ Raw file backed up
- ✓ Core 10 fields included

### Cleaning

- ✓ Missing email removed
- ✓ Email duplicates removed
- ✓ 499-row split verified
- ✓ Original columns unchanged

### Verification

- ✓ Every batch processed
- ✓ Invalid removed
- ✓ Risky/unknown separated
- ✓ Verified files renamed

### Personalization

- ✓ Excluded locations removed
- ✓ Wedding/music video removed
- ✓ FIRST_NAME cleaned
- ✓ ICEBREAKER verified-only

### Campaign

- ✓ Variables mapped
- ✓ 18 inboxes balanced
- ✓ 25/day limit respected
- ✓ Test email passed

### Tracking

- ✓ Drive files linked
- ✓ Notion status updated
- ✓ Metrics recorded daily
- ✓ Replies handled quickly
